

Q3 2023

# Wage Report – Houston, TX

Created by WagePage  
in partnership with Upshift

## Q3 overview: Wages Stagnate, 55+ Workforce Rises, and Companies Tread Cautiously Despite Economic Stability"

The state of the employment market in Q3 reveals several noteworthy trends. First and foremost, wages have shown signs of stagnation or even slight declines in some cases. This wage trend indicates a cooling in the labor markets, suggesting that the rapid wage growth experienced in previous quarters may finally be tapering off. Despite this, unemployment rates remain in the low single digits, which, while seemingly positive, presents its own set of challenges.

Another notable development in the employment landscape is the increasing availability of the 55+ labor pool. While this trend is a testament to growing workforce diversity, it also has implications for those entering certain fields, as competition may become more intense. Additionally, companies are showing a degree of caution as they approach 2024, with tempered spending and restrictive budgets. This abundance of caution is interesting given that recessionary indicators are on the decline, suggesting economic stability, yet there seems to be a lack of overall confidence. Perhaps it's just skepticism!

Looking ahead to the end of the year and into 2024, it is apparent that flexibility and engagement will play pivotal roles in shaping hiring plans. High-quality labor is becoming increasingly selective in their job choices, emphasizing the importance of employers offering attractive work arrangements and engagement opportunities.

## How have we collected this data?

Thanks to **our partnership with Upshift**, a leading labor marketplace, **we are able to collect real-time, supporting data for workers in various industries and positions.** These are verified rates being paid today to Upshift workers in a wide variety of positions.

## Offering accurate and attractive wages helps fill the applicant pool

As companies begin to compete for a scarce pool of labor, wages are rising quickly and many hourly workers are aware of this and are no longer wary of changing jobs for a better-paid position.

With more transparency on the current market rates, offering **competitive wages and accurate data** is one of the best ways to make sure you can attract enough job candidates.

## How to best use the information given in the report

The Wage Report is a resource giving transparency on the wages set by companies in specific markets. **Its purpose is to help make informed decisions** on setting wages for workers looking for jobs on the market. Accurate wages help keep the labor markets competitive while maximizing worker satisfaction from the positions and minimizing overspending on the employer side.
